# CERTIFICATE

## Company Certificate/product Certificate

### WHAT IS ISO 9001: 2015?

ISO 9001 is the international standard for a quality management system ("QMS"). In order to be certified to the ISO 9001 standard, a company must follow the requirements set forth in the ISO 9001 Standard. The standard is used by organizations to demonstrate their ability to consistently provide products and services that meet customer and regulatory requirements and to demonstrate continuous improvement.

### YADA SEDEX 4P CERTIFIED

What is Sedex?

Sedex Members Ethical Trade Audit

YADA chose to co-operate with Sedex to promote the sustainable development strategy through the international authoritative certification system. Being certified by SMETA demonstrates that we have met the global social responsibility standards, which helps us to expand our international business, facilitating international business development, specifically in the areas of health and safety, working conditions, environmental assessment and business integrity.

### YADA BRC audit: Grade A

What is BRC?

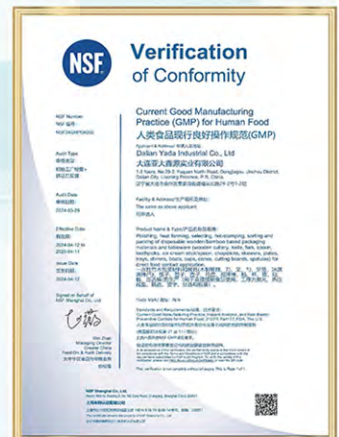

BRC is an international Food Safety Management Systems standard and is one of the GFSI (the Global Food Safety Initiative) recognized certification schemes. It contains requirements for food processors to follow to build an effective food safety management system. For the purposes of certification, the food industry is broken down into five key categories: Food Safety, Packaging and Packaging Materials, Storage and Distribution, Agents and Brokers, and Consumer Products.

### What is GMP

Good Manufacturing Practices or GMP is a system that consists of processes, procedures and documentation that ensures manufacturing products, such as food, cosmetics, and pharmaceutical goods, are consistently produced and controlled according to set quality standards. Implementing GMP can help cut down on losses and waste, avoid recall, seizure, fines and jail time. Overall, it protects both company and consumer from negative food safety events.

GMP examine and cover every aspect of the manufacturing process to guard against any risks that can be catastrophic for products, such as cross-contamination, adulteration, and mislabeling. Some areas that can influence the safety and quality of products that GMP guideline and regulation address are the following:

- Quality management
- Sanitation and hygiene
- Building and facilities
- Equipment
- Raw materials
- Personnel
- Validation and qualification
- Complaints
- Documentation and record keeping
- Inspections and quality audits
